WORK EXPERIENCE

Senior Front-End Developer | VicOne (Trend Mirco)

Sep. 2021 - Mar. 2025

VicOne delivers a broad portfolio of cybersecurity software and services for the automotive industry.

- Led the automation of UI end-to-end testing with Cypress & TestRail, reducing manual testing time by 50% while improving product quality, delivery efficiency, and user satisfaction.
- Spearheaded a multilingual company website using Next.js, TypeScript, and i18n libraries, improving SEO and optimizing code. Achieved a 30% boost in rendering performance, faster page loads, and reduced server costs.
- Led a CMS system using Wagtail CMS and GraphQL with an AI-driven automation engine to parse and categorize incidents, reducing manual effort and improving data accuracy.
- Implemented a micro-frontend architecture using Nx to modularize large-scale applications, improving scalability and maintainability. Leveraged React, TypeScript, and Vitest to enhance Frontend development workflows.
- Enhanced application performance and efficiency by implementing lazy loading, code splitting, and efficient API handling, reducing load times across the platform.

Senior Front-End Developer | Synttro

May 2020 - Sep. 2021

Synttro is a company that develops team collaboration ERP systems for the B2B construction industry.

- Led a UI/UX revamp across the web/APP to enhance consistency and boost user adoption.
- Developed a collaborative B2B ERP platform, enhancing usability by 60%, automating workflows, and streamlining real-time reporting & multi-level access.
- Implemented unit testing with Puppeteer to enhance product reliability.
- Built drag-and-drop form builder, streamlining form creation and improving user efficiency in B2B workflows.
- Implemented canvas-based PDF annotation, enhancing document interaction

Front-End Developer | Citiesocial

May 2018 - Aug. 2019

Citiesocial is an online selection shop with that website established by Shopify.

- Designed Shopify-based e-commerce interfaces, boosting conversion rates by 40%.
- Optimized SEO strategies to secure first-page rankings, boosting organic traffic by 40%.
- Collaborated with UI designers to define activity page templates, reducing launch time from a week to one day.
- Integrated behavior analytics (Hotjar, GA/GTM), enabling data-driven UI optimizations and providing actionable insights for marketing strategies.

EXPERIENCE

Engineer | momo.com Inc.

Aug. 2016 - Mar. 2018

momo is a leading online retail company in Taiwan.

- Optimized shopping cart interface, accelerating user navigation and increasing checkout speed.
- Revamped mobile TV shopping UI, boosting accessibility and enhancing user interaction.
- Refactored the desktop and mobile homepage UI, improving user experience and accessibility.
- Tracked and analyzed website performance using Google Analytics & Google Speed, optimizing loading time and responsiveness.
- Analyzed user search queries and optimized product pages for SEO, achieving top 3 rankings on the first search results page.

Graphic & Web Designer | Skyway Inc.

Sep. 2015 - Jul. 2016

Skyway is a travel agency.

- Designed marketing materials (brochures, flyers, digital ads) to enhance brand visibility.
- Created event booth designs, improving visitor engagement at exhibitions.
- Developed and maintained the company website, optimizing UI and performance.
- Designed website banners and promotional graphics, ensuring brand consistency.

Designer | Tukeen Inc.

Oct. 2013 - Jul. 2015

Design, manufacture and sale of hardware tools, such as fire water guns, to the United States and Europe.

- Designed the company's brand logo to establish a strong visual identity.
- Managed product photography, image retouching, and publication design for marketing materials.
- Communicated with international clients and shipping companies, handling logistics and business coordination.
